

**Project Risk Management:**

Evaluation of technical risks with regard to water tightness and proposal for detail design and construction

**Project Name:**

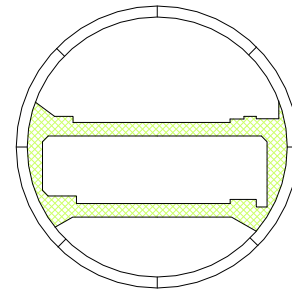

*SMART Flood Relief and Motorway Tunnel Kuala Lumpur, Malaysia Risk Analysis and Design of Watertight Construction*

Alternative Methods of Construction

**Project Characteristics**

Programme: 2000 - 2004  
Value: Euro 500 Million

Minimising Costs with WT Injection Techniques

**Our Services**

Analysis of detailed alternative methods of construction and layouts within agreed budget and design and supervision of White Tank Construction methods using single pass linings and resin injection technologies.

TBM Construction Box Interface

**Your Benefits**

Single pass linings with minimum construction times and costs.  
Reduction of land usage and 10 year guarantee on water tightness
